Sydney, N.S.W. 2000

February 21st, 2024

Dear @Pay Community,

We hope this message finds you all in good spirits. We're writing to share an important update regarding our smart contract and token migration.

Recently, we conducted a thorough audit of our smart contract as a commitment to ensure the utmost security and reliability for our community. As a result of this audit, we have updated our smart contract to reflect the new Solana token standard SPL-2022. The new token has increased privacy, compliance, and utility measures that enhance the protection of our ecosystem and promote a better blockchain community for everyone to participate.

Also, in line with our commitment to upholding the highest security standards, we have made the decision to migrate our token from MEXC to BitMart. This strategic move aligns with our stringent security policies and ensures a safer and more resilient environment for our token holders.

This means that your existing tokens must be replaced with new ones. For this, please visit www.AtPay.io or contact us at Support@AtPay.io and we will be happy to assist you; also, please do not hesitate to reach out if you have any inquiries or require further information about the smart contract audit or the token migration process.

We understand that changes like these may raise questions, and we want to assure you that our team is here to provide any necessary support and clarification.

We greatly appreciate your continued support and understanding as we prioritize the security and stability of our platform. Your trust means everything to us, and we remain dedicated to delivering the best possible experience for our valued community.

Thank you for being part of the @Pay journey.

Best regards,
